

Experience

Boston Public Library (Boston, MA)

Web Services Librarian (2017-present)

I manage the Boston Public Library website, the events platform, and our group of nearly 30 bloggers. I ensure accessibility standards are met, and also work on the strategic vision for the website.

Notable Accomplishments:

- In my first six months I led and project managed the migration of bpl.org content from a static site into a content management system (CMS)
- Worked with our CMS vendor and my team to close an outstanding accessibility complaint with the Department of Education.
- Designed a survey and usability test to test the experiences of older adults on our website. I wrote a report detailing our findings, and recommendations for ourselves and our vendors to change.

Environmental Protection Agency(EPA) - ASMS Contractor (Washington D.C)

Information Architecture Librarian (2014-2017)

I managed the Laws & Regulations section of the EPA website. My team and I worked on migrating and transforming content from the static epa.gov website into Drupal 7 and making content easier to access.

Notable Achievements:

- Co-wrote a white paper on the use of tabs and accordions and why their use was not recommended
- Migrated whole sections of the EPA.gov website, including Stationary Sources of Air Pollution and Sulfur Dioxide Pollution
- Worked with multiple departments to redesign and develop guidelines for the A to Z Topics list

First Circuit Court of Appeals (Boston, MA)

Library Technician & Website Content Strategist (2013-2014)

I moved the library’s static intranet site into Drupal and processed incoming subscription materials.

Notable Achievements:

- Built the library’s intranet website and tested the site’s efficacy with key stakeholder groups
- Developed guidelines for the new library intranet website

Education

Northeastern University, 2012

Simmons University, 2015

B.A International Affairs & Anthropology
